

POCKET FORM™ ISOLATOR

FEATURES & BENEFITS

Features / Benefits

- A perfectly formed column isolation shape is guaranteed every time with the PFI, installed in a fraction of the time required with conventional alternative forming methods.
- Eliminates all removal and disposal of temporary form materials, providing a faster, cleaner and safer installation.
- Same day pouring of formed blockouts is possible if column is erected prior to slab placement.
- PFI is assembled, leveled and anchored in a fraction of the time spent erecting wood or cardboard forms.
- Individual sections can be used to create multiple sided isolations where necessary.
- Easily drill or cut PFI for penetration of piping, conduit or electrical wiring, creating excellent utility or refrigeration line pull boxes.
- The PFI is made of lightweight high-density polyethylene and is manufactured in over 1600 shapes and sizes.
- Each PFI is individually packaged for a complete installation, including hardware and instructions in English and Spanish.
- PFI is primarily made from recycled materials, adding to the preservation of the environment in which we live.

The optional lid allows for:

- Screeding and finishing around and over the PFI without concrete filling the formed void.
- Casting concrete tilt walls over the PFI
- A safer working environment free of dangerous pits in the floor.
- Keeping debris out of isolation area.
